

Name: _____ Date: _____ Period: _____

Use the **Elimination Method (Multiplication: Addition or Subtraction)** to solve the system of equations:

$$2x + 3y = 1$$

$$5x + 7y = 3$$

$$2x + 4y = 0$$

$$3x + y = 5$$

$$4x + 3y = 13$$

$$x + y = 4$$

$$3x - 5y = -13$$

$$4x + 3y = 2$$

$$x - 3y = -1$$

$$2x - 4y = 2$$

$$-5x + 2y = -1$$

$$x - y = 2$$

$$2x + 2y = 4$$

$$x + 3y = 10$$
